List Of Physical Test By Industry

List of basic skill test by industry

Subject	Number	Name of Subject	Noter
Strength	1	Grasping power	Commonm
	2	Back strength	
Cardio	1	Burpee Test	Select 1 Subject (by HRDK)
	2	Moving Equipment	
	3	Push Hand Cart	

Guideline For Subjects

Measuring Grasping Power

Watch the video

Job Category	Common	Subject	Measuring grasping power

I Requirements

– Measure your grasping power with each hand once by using a grasping power measurement tool.

II Guidelines for Applicants

– Warm up your body before the test te prevent safety accidents.

– If you fail to prepare for each item or perform each test item in the correct posture, you will receive the lowest marks.

– Each test can be taken only once.

Job Category	Common	Subject	Measuring grasping power

Ⅲ Instructions

① Stand up with feet opened as wide as your shoulders and arms lowered.

② Face the gauge display towards the outside and grab the gauge with the second finger knuckles.

③ Keep your arms straight and make sure that the angle between each arm and body is 15 degrees.

④ Upon hearing the starting signal, pull it as strongly as possible for two to three seconds.

⑤ Perform the foregoing process once for each hand.

❋ Precautions

– Use only hand power. Do not bend your arms or use your body.

– Do not make the measurement tool sway or touch your body during the test.

Measuring Grasping Power

Watch the video

Job Category	Common	Subject	Measuring back strength

I Requirements

– Measure your back strength once by using a back strength measurement tool.

II Guidelines for Applicants

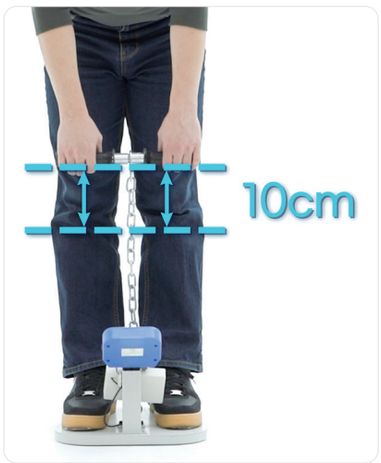

– Warm up your body before the test te prevent safety accidents.

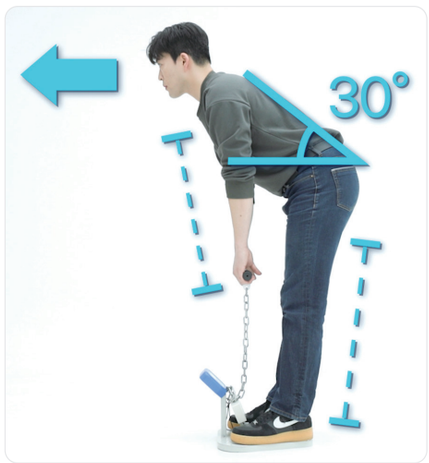

– If you fail to prepare for each item or perform each test item in the correct posture, you will receive the lowest marks.

– Each test can be taken only once.

Job Category	Common	Subject	Measuring grasping power

Ⅲ Instructions

① Stand up on the measurement tool with the distance between both feet being around 15cm.

② Bend upper body by around 30 degrees with knees and arms stretched, and grasp the handle correctly.

③ Make sure that the location of the handle is 10cm higher than your knees.

④ Upon hearing the starting signal, pull your upper body as strongly as possible and at the same time pull the handle for three seconds.

⑤ Implement this process once only.

※ Precautions

– To prevent injuries, make sure that you do not bend your waist or back when pulling the measurement tool.

– Make sure that you pull the tool straight upwards so that it does not lose balance.

– Those who have a back or waist injury or problem must not take this test.

Time Limit

30sec

Burpee Test

Watch the video

Job Category	Common	Subject	Burpee Test

I Requirements

– Implement the burpee test in an accurate posture.

II Guidelines for Applicants

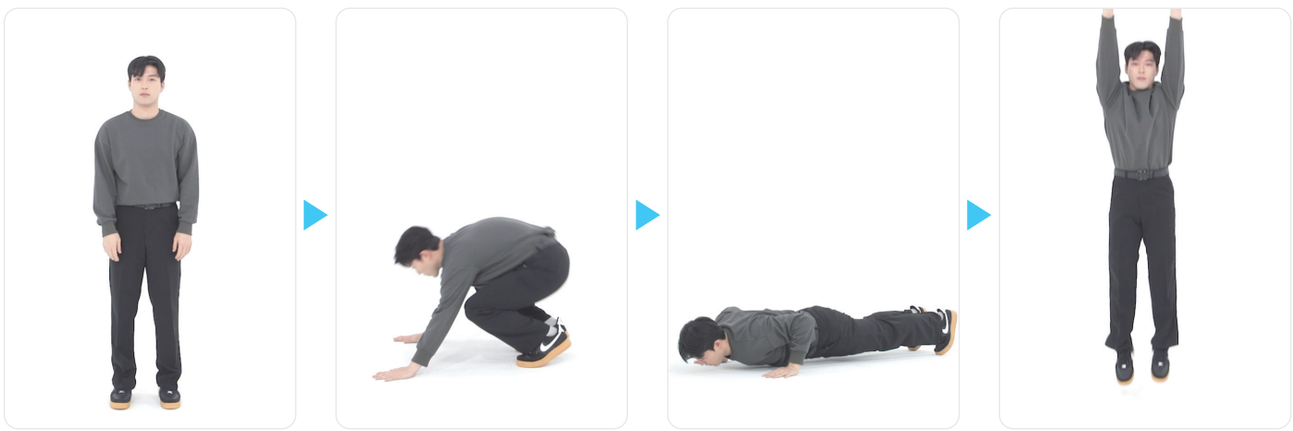

– Warm up your body before the test te prevent safety accidents.

– If you fail to prepare for each item or perform each test item in the correct posture, you will receive the lowest marks.

– Each test can be taken only once.

Job Category	Common	Subject	Burpee Test

Ⅲ Instructions

① Stand up straight.

② Bend your body forward and put your hands about 30cm in front of your toes.

③ With your hadns touched, you kick your feet back and take a prone position. At this time, your chest and knees must touch the floor.

④ After returning to the bent position, jump off the floor with both hands above your head.

⑤ Upon hearing the starting signal, pull it as strongly as possible for two to three seconds.

※ Precautions

– When taking a prone position, your chest and knees must touch the floor. Otherwise, it is not counted as the number of completions.

– Be sure raise both hands above your head when jumping from the floor. Otherwise, it is not counted as the number of completions.
