Using A Grass Eliminator

Watch the video

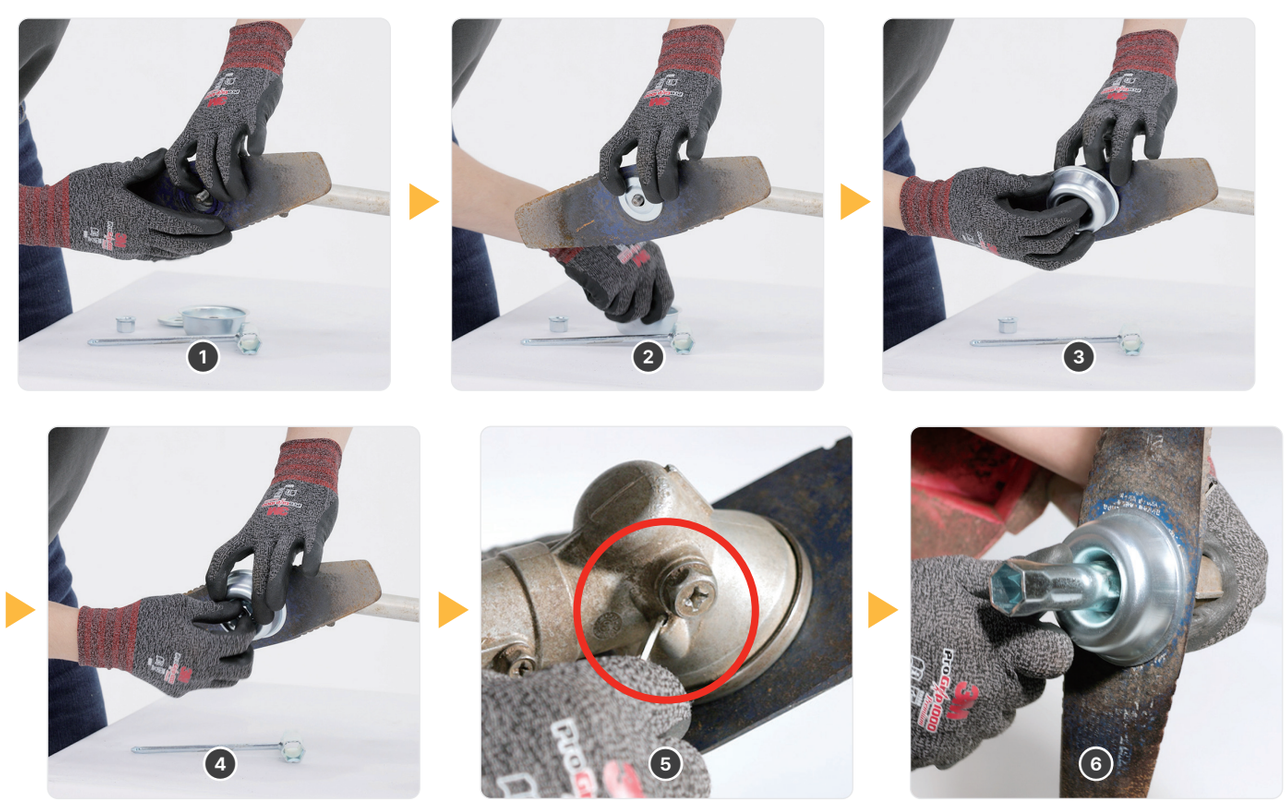

Job Category	Agriculture & Livestock	Subject	Using a grass eliminator

I Requirements

– Recognize how to use the grass eliminator needed for weeding.

II Diagram & Requirements

1) Diagram

Job Category	Agriculture & Livestock	Subject	Using a grass eliminator

2) Requirements

① Combine the blade with the grass eliminator.

② Combine the washer over the blade.

③ Combine “만조(Component)” over the washer.

④ Combine the nuts by turning them counterclockwise by hand.

⑤ Press a hexagon wrench into the top of the grass eliminator and turn the blade to fix it.

⑥ Hold the hexagon wrench down and use the “플러그 복스(Component)” to secure the nut completely.

⑦ After completing prior processes, turn on the grass eliminator and perform the simulation.

⑧ Check with the instructor, then turn off the power and perform the disassemble operation.

Fence Install

Watch the video

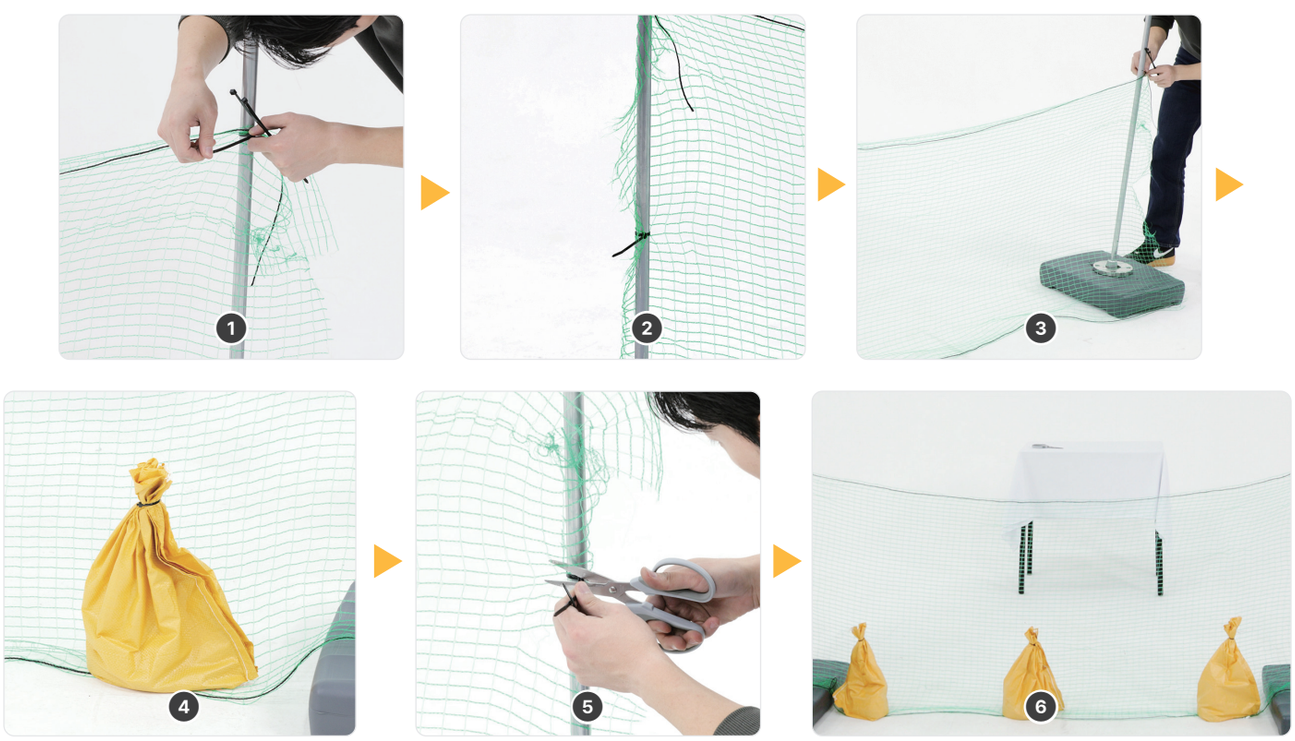

Job Category	Agriculture & Livestock	Subject	Fence Install

I Requirements

– Carry out the fence installing to protect crops.

II Diagram & Requirements

1) Diagram

Job Category	Agriculture & Livestock	Subject	Fence Install

2) Requirements

⓪ (Prep) Tow posts are placed fixed to the floor at intervals of 2m, mark at the top, middle and bottom of posts theposition of cable tie fixing.

① Use cable ties to secure the fence around the top of one post so that it won't loosen.
Work by adjusting the length ofthe net so that the bottom of the net is pulled to the floor.

② Secure the fence with cable ties to the position of middle and bottom of the posts.

❖ If a cable tie is secured in an incorrect location, the lowest score will be assigned for that item.

③ Fix the other post with fence on the same way. Be careful not to put the fence down too much.

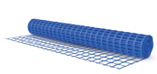

④ Press with a sandbag to prevent any space at the bottom of the fence net.

⑤ After securing the cable ties on both support posts, trim the excess ends not related to the fastening with scissors.

⑥ Raise your hand and check with the instructor, then follow the instructions to carry out the disassemble.

Job Category	Agriculture & Livestock	Subject	Fence Install

Ⅲ Equipment & Materials

Equipment & Materials		Spec.	Unit	QTY	Remakrs
 Post		· Diameter 20mm or more, length 1.5m or more. · If it is difficult to fix the support post, prepare a rod-shaped device that can be supported on the ground	PCS	2	For 1 person
	Fence net	· 3m1m wide and 3m long	PCS	1	For 1 person
	Cable Tie	· 200mm More than 200mm	PCS	6	For 1 person
	Scissor	· No specific standard (for cable tie removal)	PCS	1	For 1 person
	Sandbag	· For fixing the bottom of the fence net	PCS	3	For 1 person
