Rope Arrangement And Knots

Watch the video

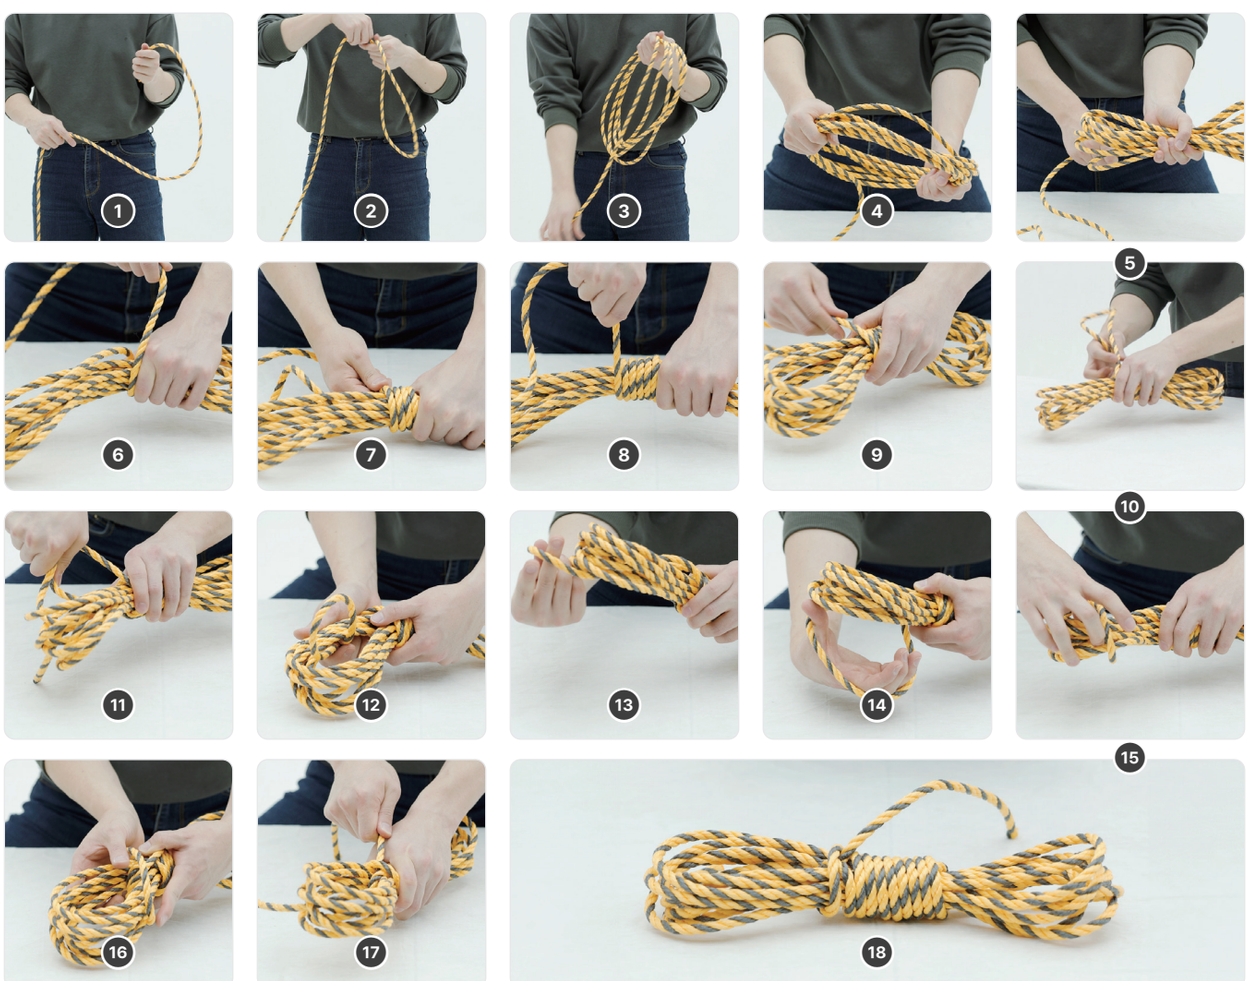

Job Category	Fishery	Subject	Rope arrangement and knots

I Requirements

– Tie and organize the rope according to the Coiling knot method.

II Diagram & Requirements

1) Diagram

Job Category	Fishery	Subject	Rope arrangement and knots

2) Requirements

①-⑧ (Rope arrangement) Hold the rope in one hand, fold it into an oval shape with the other hand, and organize it until itleaves a tail of about 70~80cm. Be careful not to twist the rope.

⑨-⑩ (Hank – rope bundle) Start wrapping the remaining 70~80cm of tail around the hank. Start at one end of the hankand wrap the ail evenly.

⑪-⑯ (Hank Coiling) Keep winding the tail part, and keep winding it repeatedely until there are about 20~25cm left ofthe remaining rope.

⑰ (Make a ring) Make a small ring with the remaining 20~25cm of rope tail, and insert this ring into the hole in the hank.

⑱ After inserting the ring into the hank, spread the ring part wide and wrap it around the hank

Finish the coiling work by pulling the tail rope part.

❖ After confirmation by the instructor, untie the knot and restore the rope to its original state.
